Product Description

Wasser Polyflex 511 TackCoat is a hot-applied, asphalt-based membrane specifically formulated with adhesive qualities to bond Wasser Polyflex polyureas to an asphalt wear coarse. Wasser Polyflex 511 TackCoat is part of a comprehensive bridge waterproofing system typically used on heavy highway projects. Unique properties allow for heavy traffic loading and protection from the effects of constant freeze/thaw cycles.

Product Features

- High tack finish
- Low temperature flexibility
- Thermoplastic formulation
- Easy to apply
- Can accept asphalt overlays within one hour

Drying Times and Temperatures

**Recommended Application Temperature:** 380-400°F (193 - 204°C)

**To Pave:** Wasser Polyflex 511 TackCoat shall be allowed to cool to ambient temperature. This dry time will vary upon site conditions. Restrict traffic prior to paving.

Surface Preparation

See Wasser Polyflex Bridge System, Field Quality Control

Recommended Systems

**Concrete Bridge Deck Waterproofing System:**

- Polyflex 111 PU Primer
- Polyflex 311 Membrane
- Polyflex 411 ShearCoat
- Polyflex 511 TackCoat
