

Troutdale Waste Treatment Plant

Troutdale, Oregon

Owner	Project	Date of Project
City of Troutdale	Exterior of Digester	Summer 1999

This digester was coated with MC-Tar in the summer of 1999 to guard against moisture. Preserving concrete is never easy, but concrete underground in Oregon's moist climate is another concern altogether. Fortunately, MC-Tar is great for concrete and steel both above and below ground.

Systems and Substrates		
Surface Preparation	Primer	Topcoat
Clean, dry and cured concrete	MC-Tar 5.0-7.0 mils DFT	MC-Tar 5.0-7.0 mils DFT
