

# Troutdale Waste Treatment Plant Troutdale, Oregon

**PROJECT DATE**  
1999

**SUBSTRATE**  
Steel

## INTRODUCTION

This digester was coated with MC-Tar in the summer of 1999 to guard against moisture. Preserving concrete is never easy, but concrete underground in Oregon's moist climate is another concern altogether. Fortunately, MC-Tar is great for concrete and steel both above and below ground.

### OWNER

City of Troutdale

### PROJECT

Exterior of Digester

### CONTRACTOR

Western Engineer  
Contractors, Ellensburg,  
WA

### SURFACE PREPARATION

Clean, dry and cured  
concrete

### Primer

MC-Tar 5.0-7.0 mils DFT

### Topcoat

MC-Tar 5.0-7.0 mils DFT
