

Yuba City Clarifier Yuba City, California

Owner	Project	Painting Contractor	Date of Project
Yuba City Public Works	Clarifier Reconditioning	Peterson' Painting Service	July, 1996

The surface of a clarifier has a wide range of chemical exposures. Yuba City was looking for a system that would give them more years from this clarifier and went with Wasser High-Tech Coatings. The MC-Tar systems have been helpful for years. We are proud to offer an industry leader in MC-Tar, which is a single component moisture cure urethane coal tar product. Ease of application, resistance to UV exposure, and great chemical resistance make this product an excellent solution.
