

HUCKLEBERRY PROPANE TANK

BOSCAWEN, NEW HAMPSHIRE

PROJECT DATE
2025

SUBSTRATE
STEEL

COMPANY

Huckleberry Propane & Heating Oil

PROJECT NAME

Propane Tank coating

CONTRACTORS

R.J. Forbes

SYSTEMS

Steel System

Primer

MC-Universal 3.0 - 5.0 Mils DFT

Intermediate

MC-Luster 2.0 - 4.0 Mils DFT

Topcoat

MC-Clear 1.0 - 2.0 Mils DFT

THE CHALLENGE

A large propane storage tank at Huckleberry Propane & Heating Oil needed protection from constant exposure to sun, moisture, and temperature fluctuations. These conditions can quickly lead to corrosion and coating breakdown if not properly addressed. The goal was to ensure long-term durability while maintaining a clean, professional finish.

WHY WASSER

Wasser Technologies was selected for its strong performance in outdoor environments where reliability is critical. Its moisture-cured urethane coatings offer excellent adhesion and corrosion resistance, along with the ability to perform consistently under changing weather conditions. This made it a dependable choice for protecting exposed steel surfaces.

OUR SOLUTION

Wasser provided a high-performance coating system that created a tough, protective barrier against environmental exposure. The applied system delivers lasting protection while retaining its appearance over time. The result is improved longevity of the tank and reduced maintenance demands moving forward.
